

IDEATION PHASE

STEP 1 — TEAM GATHERING

Problem Statement	Students face difficulty finding relevant academic answers from a large collection of FAQs.
User Need	Students need a simple system where they can ask questions naturally and receive relevant answers quickly.
Proposed Idea	Develop an AI FAQ Assistant Web Application that matches user questions with relevant stored FAQs using a custom text-similarity based matching engine.

STEP 2 — BRAINSTORMING

1	Traditional FAQ Search	Search FAQs using keywords
2	Category Search	Organize FAQs based on categories
3	AI Question Matching	Match user questions with relevant FAQs
4	Related Suggestions	Display related questions
5	User Authentication	Provide secure registration and login
6	Admin Dashboard	Allow administrators to manage FAQs
7	FAQ View Tracking	Track FAQ views
8	AI Chat Interface	Provide a simple question-answer interface

STEP 3 — IDEA PRIORITIZATION

AI Question Matching	High	High
FAQ Management	High	High
User Authentication	High	High
Category Management	High	High
Related Suggestions	Medium	Medium
User Management	Medium	Medium
FAQ View Tracking	Medium	Medium
Advanced Analytics	Medium	Future Enhancement

STEP 4 — SELECTED SOLUTION

User Authentication	Users can register and securely login to the application.
FAQ Management	Administrators can create, update, view, and delete FAQ entries.
Category Management	FAQs can be organized into categories.
AI Question Matching	The system analyzes the user's question and identifies the most relevant FAQ.
Related Suggestions	The matching engine can provide related FAQ suggestions.
Role-Based Access	Different access permissions are provided for users and administrators.

STEP 5 — FINAL PROJECT CONCEPT

User Question → Text Processing → FAQ Matching Engine → Similarity / Match Score → Most Relevant FAQ → Answer + Related Suggestions

STEP 6 — FUTURE ENHANCEMENTS

- Natural Language Processing enhancement.
- Multilingual FAQ support.
- Voice-based question input.
- Advanced semantic search.
- Conversation history.
- Personalized FAQ recommendations.
- Advanced analytics dashboard.
- User feedback-based improvement.
- Integration with external academic information sources.

Final Ideation Statement

The AI FAQ Assistant is designed to transform a traditional FAQ system into an intelligent question-answering platform where students can ask questions naturally and receive relevant information quickly through AI-assisted FAQ matching.
